

LEADING THE INDUSTRY SINCE 1983

Best Equipment and Welding excels at both! For more than 40 years, Best has been a recognized leader in the design and application of loading dock equipment, products and services – and is rated best-in-class for its custom fabrication solutions.

Two distinct divisions that integrate perfectly to meet all of your needs...

from start to finish; **it's what sets us apart from the competition.**

Headquartered in Indianapolis and a service branch in Jeffersonville, Indiana, our extensive client base includes Fortune 500 companies, large distribution centers, hospitals, schools, commercial centers, and smaller entrepreneurial ventures, many of whom have been clients for 30+ years.

At Best Equipment and Welding, all jobs are completed to total client satisfaction by a team of highly skilled sales engineers, factory trained technicians, and certified fabricators and welders.

LOADING DOCK EQUIPMENT

SERVICES

DOCK-LEVELING

EQUIPMENT & SERVICE

From new construction to renovation, Best Equipment designs, installs and maintains loading dock equipment for warehouses and truck terminals of all sizes. Our superior-quality levelers, whether hydraulic, mechanical or pneumatic, come in a variety of sizes and capacities to meet any loading dock requirements – and are engineered to ensure a smooth, efficient, and ergonomically-minded loading process.

What's more, our custom-designed and manufactured dock seals come in a variety of styles, colors and fabrics tailored to your unique application and guaranteed to maximize appearance, style and employee comfort.

We also offer a wide selection of truck restraint systems designed to ensure safety and optimize efficiency while loading or unloading trailers at the loading dock.

Best Equipment and Welding service all dock manufacturers when your equipment needs service or repair. We also offer planned maintenance programs, which includes cleaning, lubricating, adjusting, and inspecting.

CUSTOM FABRICATION SOLUTIONS

At Best Equipment and Welding, we transform concepts into solutions, and we do it at a price that meets your budget. We call it "value engineering." Whether you provide the design or we do, our skilled engineers will fabricate a solution to meet your specific production needs. No job is too big or too small;

Best Equipment excels at projects of any scope and size
from prototype development to job-shop and large-scale production runs.

Our 20,000-square-foot fabrication facility features production manufacturing in carbon steel, aluminum and stainless steel. And we build everything in-house to your exacting specifications, including approach ramps, racks, material-handling carts, industrial and architectural stairways, mezzanines, ADA-compliant wheelchair ramps and railings, conveyor or crossover bridges, guarding systems, access ladders and personnel platforms.

All of our products are manufactured for durability, and every finishing detail is provided on time and on budget!

YOUR SINGLE SOURCE

FROM DESIGN TO SERVICE

Best Equipment and Welding is your single source for design, product, application, installation and service.

Whether we're erecting new structures, installing equipment or performing safety-critical jobs such as column replacement, our trained field installers are equipped with fully stocked, welder-equipped service trucks. That means we can complete any job on the spot. And should you need repairs or preventive maintenance, we make it a priority for next-day service.

At Best Equipment and Welding, we'll transform your ideas into superior-quality finished products at a price you can afford. Solving problems...adding value...it's what we do Best!
